ABOUT

I am a Full Stack Software Developer who loves creating, designing, and working with people. I'm passionate about connecting people and making the world a better place through Tech. I have a diverse background in my work history and personal life. I've done everything from a Fire Fighting to Wood Working. This has given me skills to communicate with a wide range of people. I've recently created a Napster Clone and a pretty fun Marvel App using TDD, Agile Practices and Mob Programming. I enjoy making apps that are fun and easy for people to use. I love collaborating on apps of the future.

WORK EXPERIENCE

BEAVERTON HONDA
