ABOUT

As a Full Stack Software Developer, my critical thinking skills give me a proven ability to troubleshoot complex problems within strict deadlines, while delivering elegant products that are appealing and user friendly. I have a passion for front end development that emphasizes a positive user experience resulting in a consistent user base. I am a team player who enjoys collaborating on projects to create, design, and deploy rich intuitive software applications and websites. My training and education have taught me how to implement UI / UX with backend engineering to find a marriage between code and design. Past work experiences including crafting custom woodwork and customer service, have contributed to my ability to deliver projects that exceed client expectations. Recent projects include a full stack job tracking site named Workür, a backend Napster Clone and a responsive Marvel Comic site using test driven development, agile practices and mob programming.

DEV PROJECTS

MARVEL MATCHES
LIVE SITE || GITHUB
Firebase w/Google Analytics - Search your favorite Marvel Characters using Marvel's API and compare which comics your favorites appear in together.

SLEEPSTER - A NAPSTER CLONE
LIVE SITE || GITHUB
Using TCP, Ngrok & AWS. Share music with anyone else connected to the server. Integrated with iTunes.

WORKÜR - JOB TRACKER WEBSITE
LIVE SITE || GITHUB
Full Stack Website using React / Redux / MongoDB. Sign in using Auth0 to add and save all your job applications in one place.

EDUCATION

ALCHEMY CODE LAB
800+ Hours
Intense Full Stack MERN training. Task focused using clean code, agile processes, and mob programming. Skill in troubleshooting, problem solving & critical thinking.

OREGON STATE UNIVERSITY
Associates Degree
Emphasis in Civil Engineering. One year at Mt. Hood Community College.
